

Data was split in a 60-20-20 train-dev-test sets maintaining disjoint speakers. The training set was kept small intentionally in order to simulate actual limited data scenarios

Data Description

	Train	Dev	Test
# Speakers	90	37	30
Duration (hrs)	56.6	18.5	18.7
# Utterances	54,020	19,976	19,784
# Tokens	539,185	195,551	196,462
