- For a monolingual system, with adequate data, we can build a robust language model and overcome training related issues

- Another major issue in building a direct robust bilingual language model is <u>LACK OF DATA</u>

The Issue

The Issue

- For a monolingual system, with adequate data, we can build a robust language model and overcome training related issues

- Another major issue in building a direct robust bilingual language model is <u>LACK OF DATA</u>

Problem Statement

Building an Automatic Speech Recognition (ASR) system
for Code Switched Speech
